

Offline Outdoor Collection

DESIGNED IN 2019

ASSEMBLY NOTES | REV 00

CLEAN

Clean with a slightly damp, soft cloth. To remove dirt and fingerprints, use quality cleaners formulated for metal and outdoor wood furniture. Wipe completely dry with a soft cloth.

MAINTENANCE

Weathering and color variation over time is natural for wood outdoor furniture. For best results, we recommend the following care: Wipe spills with a clean dry cloth, cover furniture in the off-season, and store indoors during winter months. Store cushions separately from furniture to help prevent staining.

PROTECT

To protect and revive weathered furniture, it is recommended to seal wood furniture. Water based sealants are most effective on bare wood, consult with your local hardware professional to select the sealant best suited for your outdoor furniture.
