

All of our leathers come from Moore & Giles, a company that works with the world’s finest artisan tanneries to develop beautiful natural leathers. Every leather is dynamic and intended to patina, becoming softer and more lovely with age. Since leather is a natural product, you’ll notice slight variations in color and markings. Such markings give leather character and enhance its beauty.

Caring for Leather

To keep your leather beautiful for all of time, avoid direct sunlight and keep away from heat sources. Too much sun will cause leather to fade. Spills can also damage your leather. Clean it up quick. Absorb any spills with a clean white cloth or paper towel. Never rub the surface or use liquids (including water) to clean your leather as they may cause stains. Instead, dust it regularly with a dry cloth. We also recommend using [Moore & Giles Conditioner](#) to keep your leather looking its absolute best.
